

I am concerned about the new broadcast service Low Power FM and FCC's current proposal to expand this service. Allowing these LPFM stations to take priority over current FM translator stations would greatly affect my life. I enjoy listening to one FM translator station: KLOVE. I support this station and have been greatly impacted by the presence of this station in my area. For years I longed for such a station in my area as there was none like it. I was so blessed to have KLOVE broadcast in our area. I also believe that the Sioux City area has been greatly affected in a positive way by the ability to receive KLOVE. I believe KLOVE's family friendly music is a great benefit to our community. There is no other contemporary Christian radio station in our area that meets the need for good family music. Losing KLOVE in our area would be a huge loss!
